

# HK-link 2.5 ton 80/45-80/35

## Basic Data:

The HK-link is mounted between the crane and the rotator on your timber lorry, and together with our Load Indicator HTP 2500 it will help you control the weight of your load with the smallest possible margin of error.

Both Link and Load Indicator is optimised to give the best results possible.

The material and the finish of the product is of highest quality. The HK-Link and HTP 2500 gives the driver a complete timber weighing system that makes it possible to load as efficient as possible.

The function of the products gives the driver the possibility to use the vehicles full capacity, and there for increase the efficiency for every transport.
